# OPEL MOVANO AND DRIVE-RITE SEMI-AIR REAR SUSPENSION

## DRIVE-RITE REAR SUSPENSION

The outstanding economy, capacity, comfort and flexibility of the Opel Movano speak for themselves. It is simply a great 'all-rounder'. But there are times when something extra is required.

One of these beneficial additions is air suspension. Among other benefits this reduces rear suspension wear, cuts road shock and improves driving characteristics. Drive Rite semi-air suspension is available for both front- and rear-wheel drive versions of the Opel Movano. It is supplied in kit form with all the components needed for installation and is underwritten by 25 years of experience in air suspension.

With 7 bar (100 psi) maximum pressure, the 6 inch double convoluted air springs work together with the factory-installed steel springs for improved control and response. As well as raising the rear bodywork by up to 5 cm, the semi air system also offers a self-levelling function. Major advantage is that the system compensates against side-heavy loading influencing the rear suspension.

For those with special needs or requirements, the internal air pressure can be manually or automatically adapted to individual needs using an optional 'air accessory' kit. These provide an easy-to-use control system with compressor controls and dashboard-mounted gauges.

## OTHER ADVANTAGES INCLUDE

- Reduced friction between spring components
- Increased ride comfort
- Improved vehicle stability and safety
- Less vehicle sensitivity in cross winds
- Optimized suspension geometry under all load conditions
- Constant ride height under all load conditions

## GUARANTEED QUALITY AND PERFORMANCE

Drive-Rite has 25 years experience in supplying high-quality air suspension systems and is a part of the largest supplier of air suspension systems in the world. All are developed and tested to the original manufacturers specifications. All meet relevant European safety specifications including TÜV and VCA.

Further advantages include:

- Easy installation with no drilling required
- User-friendly operation
- High-quality components made in USA, Germany and Ireland
- Available for all Movano models since 2010
